CellaLift Serum

A Nutrient Rich Serum is designed to lift and tone, leaving your skin more elastic and supple. Vitamin B3, Vitamin B5, and Sea Kelp are all hydration powerhouses, promoting moisture retention in the skin. Vitamin C and DermaPeptide Toning and Tightening work to replenish damaged cells by producing more collagen.

Ingredients:

Aqua (water), Lactobacillus/ Nereocystis Leutkneana Ferment Filtrate, (Phospholipids & Niacinamide & Panthenol & Ascorbyl Palmitate & Linoleic Acid & Tocopheryl Acetate), Opuntia Tuna Flower/Stem Extract, Cucurbita Pepo (Pumpkin) Seed Extract & Cell Culture Extract, Gnaphalium Leontopodium Flower Extract, Glycerin & Saccharomyces/Sea Silt Ferment, Hydrolyzed Wheat Protein, Punica Granatum Extract & Citrus Aurantium Dulcis (Orange) Flower Extract, Yeast Extract, Lactobacillus Ferment Lysate Filtrate, Helianthus Annuus (Sunflower) Seed Oil and Lupinus Albus Seed Extract, Lactobacillus Ferment, Lactobacillus & Cocos Nucifera (Coconut) Fruit Extract.

PH: 5.2

- Sea Kelp BioFerment - Oil free moisturizer full of vitamins and minerals with anti inflammatory properties.
- Vitamin B3 Liposome - Used in the delivery of vitamins and minerals to the skin. It has antioxidant benefits and anti microbial properties.
- Panthenol Liposome - Improves hydration while reducing redness and inflammation.
- Vitamin C Liposome - Promotes anti-aging and anti-oxidant properties. It is required for collagen production and involved in the regeneration and maintenance of many tissues.
- EFA Liposome - Liposome containing essential fatty acids: linoleic acid and tocopherol, which the body cannot synthesize. They supplement the epidermal lipids, increase moisture and participate in normal oxidative reactions.
- Prickly Pear Extract - Rich in Vitamins A, C, calcium, potassium, flavonoids, and alkaloids that work synergistically to protect, repair, and soothe the skin and hair.
- Phyto-Biotics Pumpkin Seed - Utilizes current stem cell technologies focusing on the specific activity of the phenolic compound provided by Ferulic acid imparting anti-aging, antioxidant, anti-wrinkle, and protective benefits, while enhancing ATP synthesis and cellular metabolism.
- Edelweiss Extract - Can improve appearance of aged and irritated skin.
- Sea Silt BioFerment G - A fermented extract using sea silt that originates off the coast of Hawaii. It is rich in red clay and numerous essential minerals. The presence of iron gives clay its color. The iron is required for proper protein formation, DNA synthesis, and cell maturation.
- DermaPeptide Tightening - Contains wheat proteins that form an elastic film on the surface of the skin that relieves wrinkles and sagging skin.
- Party Face POM - The higher weight carbohydrates of pomegranate create a film on the skin's surface, acting as a barrier and holding moisture. This allows for noticeable lifting with increased suppleness.
- DermaPeptide Toning - Isolated peptide sequence from yeast to increase production of collagen and improve concentration of various glycoproteins.
- DermaPeptide Lightening - Intended to reduce the appearance of hyperpigmentation types of melanin.
- 5. Helianthus Annuus (Sunflower) Seed Oil & Lupinus Albus Seed Extract - Lupeol, active molecule increases the synthesis of a high quality collagen by promoting the synthesis of HSP 47 (Heat Shock Proteins), a "Chaperone" protein to increase elasticity and firmness in the skin.
