CellaPep Eye Serum

A lightweight serum is specifically formulated with nutrients that help minimize dark circles and wrinkles around the eyes. Epidermal Growth Factor (EGF) and Vitamin K are the quintessential ingredients, chosen due to their healing properties. Horse Chestnut Extract is strategically added to strengthen your capillaries, preventing swollen eyes and reducing shadows around your eyes. DermaPeptide Toning brings on the production of collagen, creating more youthful, taut skin.

Liposomes

Peptides

Hydration

Anti Inflammatory

Collagen and Elasticity

Ingredients:

Aqua (water), Lactobacillus/ Nereocystis Leutkneana Ferment Filtrate, Phospholipids & Phytonadione, Aesculus Hippocastanum (Horse Chestnut) Extract, Phospholipids & Linoleic Acid & Tocopheryl Acetate, Cucurbita Pepo (Pumpkin) Seed Extract & Cell Culture Extract, Gnaphalium Leontopodium Flower Extract, Ceramide NP; Ceramide AP; Ceramide EOP; Phytosphingosine; Cholesterol; Sodium Lauroyl Lactylate; Carbomer; Xanthan Gum, Glycerin & Vigna Aconitifolia Seed Extract & Sodium Citrate, Hydrolyzed Wheat Protein, Yeast Extract, Punica Granatum Extract & Citrus Aurantium Dulcis (Orange) Flower Extract, Lactobacillus Ferment, Lactobacillus & Cocos Nucifera (Coconut) Fruit Extract, Phospholipids & rh-Oligopeptide-1

Stem Cells

Moisturizing

Anti Oxidants

Bio-Fermentation

PH: 5.4

- Sea Kelp BioFerment - Oil free moisturizer full of vitamins and minerals with anti inflammatory properties.
- Vitamin K Liposome - Vitamin K1 aka phytomenadione , is made by plants and it performs the classic functions of Vitamin K, including its activity in the production of blood clotting proteins. While increasing capillary strength, it diminishes the appearance of dark circles under the eyes, redness from rosacea, and broken capillaries.
- Horse Chestnut Extract - Contains Saponins that may reduce capillary fragility and prevent leak of fluids into surrounding tissues which can cause swelling. It is a more powerful antioxidant than vitamin E.
- EFA Liposome - Essential fatty acids: linoleic acid and tocopherol which the body cannot synthesize. They supplement the epidermal lipids, increase moisture and participate in normal oxidative reactions.
- Phyto-Biotics Pumpkin Seed – Utilizes current stem cell technologies focusing on the specific activity of the phenolic compound provided by Ferulic Acid imparting anti-aging, antioxidant, anti-wrinkle, and protective benefits, while enhancing ATP synthesis and cellular metabolism.
- Edelweiss Extract - Can improve appearance of aged and irritated skin.
- Ceramide Complex - Mix of ceramides , cholesterol , and free fatty acids. It provides unique restoring capabilities and enhanced moisture.
- Vigna Aconitifolia Ext - A natural botanical alternative to Retinol with potent antioxidants properties. It provides protection from free radical damage.
- DermaPeptide Tightening - Contains wheat proteins that form an elastic film on the surface of the skin that relieves wrinkles and sagging.
- DermaPeptide Toning - isolated peptide sequence from yeast to increase production of collagen and improve concentration of various glycoproteins.
- Party Face POM - The higher weight carbohydrates of pomegranate create a film on the skin's surface, acting as a barrier and holding moisture. This allows for noticeable lifting with increased suppleness.
- EGF Liposome - Epidermal Growth Factor, or EGF, is a strong promoter of epithelial and fibroblast proliferation. It is able to enhance wound repair by promoting collagen production. Upon injury, EGF is released in the skin and activates EGFR (epidermal growth factor receptor).
