

CellaFirm Day Creme

This Anti-Aging Creme is designed to vitalize your skin by boosting its ability to produce healthier and younger cells. Its unique formula is created with ingredients like Epidermal Growth Factor (EGF), strong promoter of epithelium and fibroblast proliferation assisting in healing. We use Vigna Acontifolia, similar to Retinol, but without the associated irritation to provide anti wrinkle benefits and potent antioxidant properties. Your skin will stay comfortably hydrated with moisture entrapping Punic Granatum Extract. Short chained proteins of Citrus Cinesis will heighten Stratum Corneum reinforcement and reduce oxidative stress. The perfect combination of nutritious hydration with instant lifting effect.

Liposomes

Stem Cells

Chelated Minerals and Vitamins

Peptides

Moisturizing

Hydration

Anti Inflammatory

Anti Oxidants

Collagen and Elasticity

Bio-Fermentation

Ingredients:

Aqua (Water), Hyaluronic Acid, Hexapeptide-11, Palmitoyl Tripeptide-5, Cucurbita Pepo (Pumpkin) Seed Extract & Cell Culture Extract, Glycine Soja (Soybean) Oil & Aloe Barbadensis, (Phospholipids & Phytonadione & Ascorbyl Palmitate & Linoleic Acid & Tocopheryl Acetate), Punica Granatum Extract & Citrus Aurantium Dulcis (Orange) Flower Extract, Glycerin & Vigna Acontifolia Seed Extract & Sodium Citrate, Glycyrrhiza Glabra (Licorice) Root Extract, Saccharomyces & /Zinc, Copper, Manganese, Iron, Silicon, Potassium Ferment, Cetearyl Alcohol & Glyceryl Stearate & Chlorelleth-20, Coco-Caprylate/Caprates, Lactobacillus/ Nereocystis Leutkneana Ferment Filtrate, Lactobacillus Ferment, Lactobacillus & Cocos Nucifera (Coconut) Fruit Extract, Helianthus Annuus (Sunflower) Seed Oil and Lupinus Albus Seed Extract, Phospholipids & rh-Oligopeptide-1.

- HYA Solution – Binds moisture, boosting moisture, and plumping the surrounding tissues. One of the chief components of the extracellular matrix contributing significantly to cell proliferation & migration.

- HexaPeptide 11 - Used for a variety of anti-aging benefits such as increasing skin tone and elasticity. It improves the stratum corneum hydration and cellular renewal.

- Palmitoyl Tripeptide-5 - Boosts collagen by transforming growth factor beta, TGF- (Tissue Growth Factor), key element in the synthesis of collagen. Protects collagen from degradation through the inhibition of matrix metalloproteinases (MMP).

- Phyto-Biotics Pumpkin Seed – Utilizes current stem cell technologies focusing on the specific activity of the phenolic compound provided by Ferulic acid imparting anti-aging, antioxidant, anti-wrinkle, and protective benefits, while enhancing ATP synthesis and cellular metabolism.

- Aloe Vera Gel Oil Extract - Moisturizes and protects the skin. It has calming effect on skin and helps to reduce itching and inflammation.

- Vitamin K Liposome - Vitamin K1 aka phytonadione, is made by plants and it performs the classic functions of Vitamin K, including its activity in the production of blood clotting proteins. While increasing capillary strength to diminish the appearance of dark circles under the eyes, redness from rosacea, and broken capillaries.

- Vitamin C Liposome - Promotes anti-aging and anti-oxidant properties as it is required for collagen production and involved in the regeneration and maintenance of many tissues.

- EFA Liposome - Essential fatty acids: linoleic acid, and tocopherol which the body cannot synthesize. They supplement the epidermal lipids, increase moisture, and present normal oxidative reactions.

- Party Face POM - The higher weight carbohydrates of pomegranate create a film on the skin's surface, acting as a barrier and holding moisture. This allows for noticeable lifting with increased suppleness.

- Vigna Aconitifolia Ext - A natural botanical alternative to Retinol with potent antioxidants properties. It provides protection from free radical damage.

- Licorice Root Extract - Brightening and soothing action, helps fade sun damage and hyper-pigmentation safely for all skin tones, while blocking melanin production.

- Bio-Chelate SIL - Contains zinc, copper, manganese, iron, silicon, and potassium. Copper is a cofactor for oxidative enzymes; it improves absorption and utilization of iron and elastin formation. Zinc has antioxidant properties, helps in wound healing, protein synthesis, cellular growth, division, and repair. Iron is involved in protein formation and cell maturation. Potassium is involved in the sodium potassium ion gates that stimulate an action potential along the cellular membrane. Manganese may help to increase firmness and elasticity of the skin.

- Helianthus Annuus (Sunflower) Seed Oil & Lupinus Albus Seed Extract - Lupeol, active molecule increases the synthesis of a high quality collagen by promoting the synthesis of HSP 47 (Heat Shock Proteins), a “Chaperone” protein. to increase elasticity & firmness in the skin.

- EGF Liposome - EGF is a strong promoter of epithelial and fibroblast proliferation and its ability to enhance wound repair by promoting collagen production. (upon injury, EGF is released in the skin and activates EGFR (epidermal growth factor receptor).
